

Elionix (www.sts-elionix.com)

Elionix is a world leading supplier of electron beam lithography systems. The scope of its business is in the research and development, design, and manufacturing of systems that utilize particle beams. Over the years, Elionix has manufactured more than 300 electron beam lithography systems and maintains the largest market share in Japan.

Products we sell: Electron Beam Lithography Systems

Territory we cover: North America (Sales & Service)

Hysitron (www.hysitron.com)

Hysitron is the world leader in developing nanomechanical test instruments. In addition to nanoindentation and microindentation, Hysitron's instrument capabilities include tribology, modulus mapping, dynamic mechanical analysis, acoustic emission monitoring, electrical contact resistance and in-situ SEM and TEM nanomechanical testing.

Products we sell: All nanoindentation and picoindentation systems

Territory we cover: New England, NY, DE, NJ, PA, MD, DC

SVT Associates (www.svta.com)

SVT Associates is a leading Ultra High Vacuum (UHV) equipment development and manufacturing company. SVT Associates is dedicated to all aspects of materials research and manufacturing. Since 1992, SVT Associates has served the needs of the UHV deposition community.

Products we sell: PVD, PLD & ALD Systems

Territory we cover: New England, NY, DE, NJ, PA, MD, DC

SEMTECH Solutions (www.semtechsolutions.com)

SEMTECH Solutions is a leading supplier of refurbished SEMs. Their growing customer install base ranges from start-ups to Fortune 100 companies. SEMTECH Solutions' sales and service engineers, located throughout the U.S., have over 200 years combined SEM experience, which provides the end-user with confidence in the SEM products they purchase.

Products we sell: Used Scanning Electron Microscopes

Territory we cover: North America (Sales and Service)
